Summary

Computer Science Engineering undergraduate with strong foundations in **Data Structures, Algorithms, Object-Oriented Programming, and Full Stack Development**. Experienced in building scalable applications using **Java, Python, JavaScript, REST APIs, and SQL databases**. Skilled in designing backend systems, API integration, debugging, and full-stack web development. Passionate about solving real-world engineering problems and building reliable, high-performance software systems.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering	2023 – 2027
Shri Ramdeobaba College of Engineering and Management (RCOEM), Nagpur	CGPA: 9.58 / 10
Higher Secondary Certificate (Class XII)	2022 – 2023
Heritage International Junior College, Nanded	82.67%
Secondary School Certificate (Class X)	2020 – 2021
Oxford The Global School, Nanded	90%

Projects

Doctor & Patient Management System *Java 21, Spring Boot 3, Spring Security 6, JWT, MySQL, React, Vite*

- Built a secure healthcare management platform for doctors, patients, appointments, prescriptions, and medical records.
- Implemented JWT-based authentication and role-based access control for Admin, Doctor, and Patient dashboards.
- Developed patient registration, appointment booking, prescription tracking, and medical record management workflows.
- Designed RESTful APIs integrated with MySQL and documented endpoints using Swagger/OpenAPI.
- Built responsive frontend interfaces using React, Tailwind CSS, Axios, and Vite.

Agentic Honey-Pot for Scam Detection and Intelligence Extraction *Python, Flask, REST APIs, Machine Learning*

- Developed an AI-powered backend system to detect and analyze scam conversations using automated response generation.
- Designed secure REST APIs for monitoring, authentication, and intelligence extraction workflows.
- Built pipelines to process suspicious communication and extract structured data including URLs, phone numbers, and financial identifiers.
- Improved system reliability through modular backend architecture, logging, and debugging practices.

AI-Assisted Hiring System *Python, Streamlit, Transformers, Pandas, NumPy, OpenAI*

- Developed an AI-powered hiring workflow platform for resume screening and candidate evaluation.
- Implemented PDF and document parsing pipelines for automated resume ingestion.
- Built skill extraction, normalization, and candidate ranking modules using NLP and machine learning techniques.
- Generated personalized interview questions based on candidate profiles and extracted competencies.
- Designed a Streamlit-based interface for recruiter review, workflow automation, and decision support.

Community Engagement Platform – Anandwan Awareness *React.js, Node.js, Express.js*

- Built an interactive platform to raise awareness about leprosy rehabilitation initiatives.
- Developed scalable backend APIs using Node.js and Express.js to manage dynamic content and engagement workflows.
- Implemented responsive frontend interfaces with React.js and optimized client-server communication.
- Applied full-stack development practices including version control, debugging, and API integration.

Achievements

- Scored **98.98 percentile in MHT-CET 2023** and **96.58 percentile in JEE Main 2023**.
- Qualified & Cleared **JEE Advanced 2023**, one of India's most competitive engineering entrance examinations.
- Achieved **2★ rating on CodeChef** with a peak rating of **1468**.
- Solved **200+ Data Structures and Algorithms problems** on [LeetCode](#).
- Participated in national-level hackathons and technical competitions.
- Maintaining a strong academic performance with a **CGPA of 9.58 / 10**.

Skills

Programming Languages: Java, Python, JavaScript, C++

Backend & Web Development: Spring Boot, Spring Security, Node.js, Express.js, React.js, REST APIs, JWT Authentication, HTML, CSS, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Database Design

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Software Development Lifecycle, Design Pattern

Artificial Intelligence & Machine Learning: Machine Learning, NLP, Transformers, Sentence Transformers, scikit-learn, Pandas, NumPy, OpenAI API, Groq API

Tools & Platforms: Git, GitHub, Postman, Swagger/OpenAPI, Streamlit, Docker, Vite, Axios

Testing: Pytest, Unit Testing, Debugging

Soft Skills: • Problem Solving • Team Collaboration • Communication • Leadership • Innovation • Rapid Learning Ability
